PROFESSIONAL EXPERIENCES

Quality Assurance and Regulatory Supervisor / Food Safety System Lead | PT PUFU | *Jan 2024 – Present*

- **Leadership & System Ownership:**
 - Served as Food Safety System Lead responsible for ISO 22000, BPOM, Halal, and company-wide quality management systems.
 - Led preparation and coordination for internal audits, certification audits, customer audits, and regulatory inspections.
 - Coordinate cross-functionally with production, warehouse, R&D, and management to ensure system implementation.
- **Regulatory & Certification Management:**
 - Successfully handled **10+ product registrations** (BPOM MD, Halal, HC, COO).
 - Manage all regulatory documentation and communication with authorities.
- **System Development & Improvement:**
 - Develop and control: Quality Manual, SOP, Work Instructions
 - Improved document control and audit readiness through systematic document review.
- **Operational Control:**
 - Supervised implementation of GMP, sanitation, traceability, and deviation handling across **25+ product lines**.
 - Lead root cause analysis & CAPA for quality issues.

Additional Assignment : Food Safety & Quality Assurance Export Specialist (Event) | PT PUFU | *Apr – May 2024 & Feb - Mar 2025*

- **Export Compliance:**
 - Registered **Health Certificates (HC)** and **Certificates of Origin (COO)** for +15 international shipments.
 - Prepared export documentation (packing lists, Certificates of Analysis, shipping documents (air/land freight reports)).

Quality Control & Document Control | PT PUFU | *Nov 2019 – Dec 2023*

- **Quality Control & Inspection**
 - Performed incoming material, in-process, and finished product inspections to ensure compliance with product specifications, food safety requirements, and company SOPs.
 - Monitored critical production processes and verified GMP, sanitation, and hygiene practices to maintain product quality and food safety standards.
 - Identified non-conforming materials and products, coordinated corrective actions with production teams, and verified implementation effectiveness.
 - Supported traceability and product release activities by maintaining accurate inspection records and quality documentation.
- **Inventory & Operational Control**

- Implemented and monitored FIFO/FEFO practices for raw material and finished goods storage, improving stock rotation and reducing product losses.
 - Conducted routine warehouse inspections to verify storage conditions, product identification, and compliance with food safety requirements.
 - **Documentation & Continuous Improvement**
 - Maintained and updated 50+ quality documents, including work instructions, inspection records, and daily quality reports, strengthening document control and audit traceability.
 - Participated in root cause analysis and corrective action (CAPA) activities to address product quality deviations and prevent recurrence.
-
